

YEAR 1

Geography

In addition to expectations from previous years, by the end of Year 1, a student at Redfield Educate Together, will be able to:

Previous learning	Refer to EYFS documentation
Current learning	Topic 1: Redfield Topic 2: The UK Topic 3: Australia
Future learning	Topic 1: Bristol – locational knowledge and climate Topic 2: London – locational knowledge and comparing to Bristol Topic 3: Mexico
	Name and locate the four countries of the UK and their capital cities
	Identify the four countries of the United Kingdom (England, Scotland, Wales, Northern Ireland)
Strand:	Recall and name the capital city of each UK country
Locational	Locate each country and capital city on a map Understand the concept of a country and a capital city
Knowledge	
	Use world maps, atlases and globes to identify the UK and its countries
	Recognise and use different types of maps (world maps, atlases, globes)
	Find the United Kingdom on a world map or globe
	Identify the countries of the UK on a map or globe
	Understand the purpose of maps and globes as tools for locating places
	Identify seasonal and daily weather patterns in the UK
Strand: Place	Recognise and describe the four seasons
Knowledge	Observe and describe typical daily weather (e.g. sunny, rainy, cloudy)
_	Identify how weather changes throughout the year in the UK
	Begin to link weather to clothing, activities, and natural changes
Strand: Human and	Understand basic geographical vocabulary (e.g. beach, cliff, forest, hill, sea, river)
Physical	Learn and use key physical geography terms
Geography	Match vocabulary to real-life examples or images
	Identify features such as hills, rivers, beaches, etc., in pictures or the local environment
	Use simple geographical language in context (e.g. "The forest has many trees")
	Use simple fieldwork and observational skills to study the local area and school surroundings
Strand:	Use simple maps/plans of the school or local area
Geographical Skills and	Make observations about buildings, land use, and natural features
Fieldwork	Collect simple data (e.g. traffic tally, weather chart)
	Use directional language (e.g. near, far, left, right)
	Ask and answer questions about what they see in the environment
Key vocabulary	United Kingdom, England, Scotland, Wales, Northern Island, City, Bristol, Redfield, River Avon, land, country, flat, street, town, road, post office, shops, parks, landscape, city, village, location, area, atlas, world, near, far, left, right, forwards, backwards

Chille progression
Skills progression

YEAR 2

Geography

In addition to expectations from previous years, by the end of Year 2, a student at Redfield Educate Together, will be able to:

Previous learning	Topic 1: Redfield Topic 2: The UK
leaning	Topic 3: Australia
	Topic 1: Bristol – locational knowledge and climate
Current Learning	Topic 2: London – locational knowledge and comparing to Bristol
	Topic 3: Mexico
Future	Topic 1: British Isles (map work and fieldwork – countries and regions)
learning	Topic 2: Earthquakes and volcanoes Topic 3: Europe and modern Italy
Strand:	Name and locate the world's seven continents and five oceans
Locational	Recall and name the seven continents (e.g. Africa, Asia, Europe, etc.)
Knowledge	Recall and name the five oceans (e.g. Atlantic, Pacific, etc.)
	Locate continents and oceans on a world map or globe
	Understand the difference between a continent and a country Identify the location of the UK in relation to other continents and oceans
	, , , , , , , , , , , , , , , , , , ,
	Compare a small area of the UK with a small area in a contrasting non-European country (Mexico)
	Identify similarities and differences in physical features (e.g. weather, landscape, wildlife)
Strand: Place	Identify similarities and differences in human features (e.g. housing, jobs, transport)
Knowledge	Use simple comparative language (e.g. hotter/colder, bigger/smaller, busier/quieter)
	Recognise that people live differently in other parts of the world
	Use photos, videos, maps, and stories to explore contrasting places
	Identify key human and physical features
Strand: Human and	Identify features such as town, village, factory, farm, house, office, port, harbour
Physical	Use key vocabulary to describe human and physical features
Geography	Describe the difference between human and physical features using pictures, maps, or
	real-life examples. Use fieldwork and observation to spot and record human and physical features in the
	school grounds or local environment.
	Use simple fieldwork and observational skills in the local environment
Strand:	Use aerial photographs and plan perspectives to recognise landmarks
Geographical	Create simple maps with a key
Skills and	Use simple compass directions (North, South, East, West)
Fieldwork	Follow and give directions using locational and directional language
Key vocabulary	continent, Europe, Africa, Asia, Australia, North America, South America, Antarctica, compass points, capital city, locality, fieldwork, rich/affluent, poor, aerial view, aerial map, centre, environment, settlement, town, village, factory, farm, house, office, port, harbour

YEAR 3

Geography

In addition to expectations from previous years, by the end of Year 3, a student at Redfield Educate Together, will be able to:

Previous learning	Topic 1: Bristol – locational knowledge and climate Topic 2: London – locational knowledge and comparing to Bristol
leaning	Topic 3: Mexico
C	Topic 1: British Isles (map work and fieldwork – countries and regions)
Current learning	Topic 2: Earthquakes and volcanoes
learning	Topic 3: Europe and modern Italy
Future learning	Topic 1: Rivers and land use (focus on Egypt) Topic 2: Comparing Egypt to Somalia Topic 3: Use of maps
	Name and locate counties and cities of the UK; geographical regions and key features
Strand:	Use maps to identify and label key cities and counties in the UK.
Locational Knowledge	Recognise and name geographical regions of the UK (e.g., the Lake District, the South West).
	Identify key human and physical features (e.g., mountains, rivers, urban centres) within selected regions.
	Use compass directions and grid references to describe the location of UK places.
	Compare a region in the UK with a region in a European country (Italy)
Strand: Place	Identify similarities and differences in physical features between a UK region and an Italian region.
Knowledge	Compare human features such as settlements, land use, and climate in both regions.
Knowledge	Use photographs and maps to support regional comparisons.
	Describe how location affects the way people live in each region (e.g., agriculture, tourism, housing).
	Describe and understand key aspects of physical geography (earthquakes and
Strand:	volcanoes)
Human and	Describe how volcanoes and earthquakes are formed using diagrams and models.
Physical	Identify key areas in the world where volcanoes and earthquakes are common.
Geography	Explain the effects of volcanic eruptions and earthquakes on people and the environment.
	Use simple geographical vocabulary to describe and record physical processes (e.g.,
	magma, tectonic plates)
	Use maps, atlases, and digital/computer mapping
Strand:	Use atlases and globes to locate countries, continents, and major physical features.
Geographical	Use digital mapping tools (e.g., Google Earth) to explore locations and gather information.
Skills and	Interpret simple map symbols and keys.
Fieldwork	Use 4-point compass directions and simple grid references (e.g. A1) to describe location and route.
Key vocabulary	County, City, Region, Map, Atlas, Compass, Grid reference, Physical feature, Human feature, Volcano, Earthquake, Tectonic plate, Eruption, Settlement, Climate, Compare, Location, Land use, Tourism, Digital mapping

YEAR 4

Geography

In addition to expectations from previous years, by the end of Year 4, a student at Redfield Educate Together, will be able to:

Previous	Topic 1: British Isles (map work and fieldwork – countries and regions)
learning	Topic 2: Earthquakes and volcanoes
	Topic 3: Europe and modern Italy
Current	Topic 1: Rivers and land use (focus on Egypt)
Learning	Topic 2: Comparing Egypt to Somalia
Learning	Topic 3: Use of maps
Fudue	Topic 1: Locational knowledge – longitude, latitude, equator
Future learning	Topic 2: Climate zones and biomes
learning	Topic 3: Comparing Brazil and UK
	Locate World Countries Using Maps
Strand: Locational	Use a variety of maps (including digital maps and atlases) to locate continents, oceans, and key countries of the world.
Knowledge	Identify the position of key countries in relation to the Equator, Tropics of Cancer and Capricorn, and lines of latitude and longitude.
	Describe the relative location of countries using compass directions and distance.
	Use map symbols and keys to interpret geographical features in different countries.
	Compare a Region in the UK with a Region in Africa
Strand: Place Knowledge	Use thematic maps, photographs, and climate data to compare physical features of two contrasting regions.
	Identify and describe differences and similarities in land use, settlements, and environment between the two regions.
	Interpret data and information to explain how the climate affects human activities in each region.
	Use comparative language (e.g. hotter, drier, more mountainous) to communicate geographical similarities and differences.
	Describe and Understand Rivers and the Water Cycle
Strand:	Identify and label features of a river using diagrams and maps (e.g. source, mouth,
Human and	tributary).
Physical Geography	Describe the stages of the water cycle and explain its importance using scientific and
Ocograpity	geographical vocabulary. Use aerial photographs and maps to trace the course of a river from source to sea.
	Explain how rivers shape the land and how they are used by humans for different purposes
	(e.g. transport, agriculture).
	Use Fieldwork to Observe, Measure, and Record Features
	Use fieldwork tools (e.g. compasses, simple measuring equipment) to observe and record
Strand:	physical and human features of the local area.
Geographical	Create a simple sketch map or diagram to represent fieldwork findings.
Skills and Fieldwork	Use charts, tallies, and bar graphs to present fieldwork data clearly and accurately.
Heldwork	Communicate findings from fieldwork through written reports, drawings, or digital presentations.
Key vocabulary	Continent, Country, Equator, Hemisphere, Latitude, Longitude, Region Climate, Settlement, Land use, River, Source, Mouth, Tributary, Water cycle, Evaporation, Precipitation, Compass, Fieldwork, Observation

Skills progression

YEAR 5

Geography

In addition to expectations from previous years, by the end of Year 5, a student at Redfield Educate Together, will be able to:

	Γ
Previous	Topic 1: Rivers and land use (focus on Egypt)
learning	Topic 2: Comparing Egypt to Somalia Topic 3: Use of maps
	•
Current	Topic 1: Locational knowledge – longitude, latitude, equator Topic 2: Climate zones and biomes
learning	Topic 3: Comparing Brazil and UK
	Topic 1: Transport in Bristol (fieldwork)
Future	Topic 2: Mountain ranges in the UK
learning	
	Use maps to focus on Europe and North and South America (Brazil focus)
	Locate major countries and capital cities in Europe, North America, and South America on
Strand:	a range of maps.
Locational	Use atlases, digital maps, and globes to identify physical features (e.g., rivers, mountain
Knowledge	ranges) of Brazil and other key countries.
	Describe the location of Brazil in relation to the Equator, Tropics, Hemispheres, Artic and
	Antartci Cirle and surrounding countries using compass directions.
	Compare map scales and recognise how different types of maps show different
	information (e.g., political vs. physical maps). Compare places in terms of geographical features
	Identify and describe key physical and human features of two contrasting locations (e.g.,
	UK vs. Brazil).
Character Diseases	Use fieldwork and map evidence to compare land use, settlement patterns, and
Strand: Place	economic activities.
Knowledge	Explain how climate, landscape, and location affect the way people live in different
	places.
	Make and justify comparisons between natural features such as rivers, mountains, or coasts
	in two regions.
Strand:	Understand climate zones, biomes and vegetation belts
Human and	Identify the world's major climate zones on a globe or climate map.
Physical	Describe the characteristics of different biomes (e.g., rainforest, desert, tundra) using
Geography	examples.
	Explain the relationship between climate zones and vegetation belts around the world.
	Compare two biomes (e.g., rainforest and temperate forest) in terms of climate, plants,
	and animals.
Chr. a.r. al.	Use 4-figure grid references, symbols and keys
Strand: Geographical	Accurately read and record 4-figure grid references on Ordnance Survey (OS) maps.
Skills and	Use a map key to identify symbols for features such as roads, rivers, and landmarks.
Fieldwork	Create a simple map using 4-figure grid references and appropriate symbols.
	Explain how map symbols and keys help to interpret geographical information quickly.
Kov	Atlas, Equator, Tropics, Hemisphere, Continent, Country, Capital city, Climate zone, Biome,
Key vocabulary	Vegetation belt, Grid reference, Symbol, Key (legend), Physical feature, Human feature,
*Ocubolaly	Land use, Settlement, Compass, Latitude, Longitude

YEAR 6

Geography

In addition to expectations from previous years, by the end of Year 6, a student at Redfield Educate Together, will be able to:

Previous	Topic 1: Locational knowledge – longitude, latitude, equator Topic 2: Climate zones and biomes
learning	Topic 3: Comparing Brazil and UK
	Topic 1: Transport in Bristol (fieldwork)
Current	Topic 2: Mountain ranges in the UK
learning	
	Extend knowledge and understanding of the world's countries (Through Learn Together strand
Strand: Locational Knowledge	and activism projects)
	Identify and locate a range of countries involved in the production and consumption of
	fashion goods on a world map.
	Compare economic and environmental impacts of fashion industries across countries
	(e.g., Bangladesh vs. UK).
	Explain how global interdependence affects people and environments in countries linked
	through fashion supply chains. Evaluate how sustainable practices in different countries can support global development
	goals.
	Understand geographical similarities and differences through a study of human and physical
	geography (focus on mountains of the UK)
	Locate major mountain ranges of the UK using maps and atlases.
	Describe the formation and key physical features of selected UK mountain ranges (e.g.,
Strand: Place	Ben Nevis, Snowdonia).
Knowledge	Compare how human activity and land use differ across UK mountain regions (e.g.,
	tourism, farming, conservation).
	Analyse how physical geography influences settlement and economic activity in
	mountainous regions of the UK.
	Describe and understand key aspects of human geography
Strand:	Define and all a second and the seco
l	Define and give examples of human geography terms such as trade, settlement, land use,
Human and	and economic activity.
Physical	and economic activity. Explain how trade links (e.g. Fashion trade routes) affect economies and environments
	and economic activity. Explain how trade links (e.g. Fashion trade routes) affect economies and environments locally and globally.
Physical	and economic activity. Explain how trade links (e.g. Fashion trade routes) affect economies and environments locally and globally. Investigate how land use has changed over time in a local area and what factors have
Physical	and economic activity. Explain how trade links (e.g. Fashion trade routes) affect economies and environments locally and globally. Investigate how land use has changed over time in a local area and what factors have influenced these changes.
Physical	and economic activity. Explain how trade links (e.g. Fashion trade routes) affect economies and environments locally and globally. Investigate how land use has changed over time in a local area and what factors have influenced these changes. Evaluate the impact of human geography decisions (transport systems) on sustainability.
Physical	and economic activity. Explain how trade links (e.g. Fashion trade routes) affect economies and environments locally and globally. Investigate how land use has changed over time in a local area and what factors have influenced these changes. Evaluate the impact of human geography decisions (transport systems) on sustainability. Use 6-figure grid references and advanced fieldwork skills
Physical Geography	and economic activity. Explain how trade links (e.g. Fashion trade routes) affect economies and environments locally and globally. Investigate how land use has changed over time in a local area and what factors have influenced these changes. Evaluate the impact of human geography decisions (transport systems) on sustainability. Use 6-figure grid references and advanced fieldwork skills Accurately use 6-figure grid references to locate features on OS maps.
